Seeds, Implements, Etc.

1879

JANUARY

1894

IN submitting this Catalogue, which contains a list of our stock of GARDEN, FIELD and FLOWER SEEDS, also a partial list of our extensive variety of IMPROVED FARMING IMPLEMENTS and MACHINES, we take this opportunity to thank the public for their liberal patronage during the past year, and hope by fair dealing, to merit a continuance of favors.

We exercise the greatest care in the selection of Seeds, and our customers may depend on their being as true and reliable as those furnished by any responsible house.

Seeds By Mail.

All Seeds ordered at ounce or package prices are delivered free. When Seeds are ordered to be mailed in quantities of one-quarter pound and upwards, postage must be added at the rate of eight cents per pound or fifteen cents per quart.

Remittances may be made by Post Office Money Order, Postal Note. Bank Drafts or Registered Letter. Small amounts may be sent in Postage Stamps.

Bags used in packing are charged at the following rates: ¼ Bush. 10c., ½ Bush. 15c., 1 Bush. 20c., 2 Bush. 25c., and if returned within 60 days, sound, and not having been used for other purposes, the above prices will be refunded.

STOCKBRIDGE MANURE STILL AHEAD.

The largest twenty prize crops of Potatoes in two year contests have been grown on Stockbridge alone.

The reason why the Stockbridge manures were so successful in these contests and elsewhere is because they are really made of the very best materials; and, as there is no cheating the plant, they are bound to win in the long run. Large quantities of unavailable plant food, costing but little, may deceive chemists in giving high analysis and high valuations; but they won't seed up the crops. The public may be misled but the plant never.

BOWKER'S HILL and DRILL PHOSPHATE.

A concentrated general fertilizer used either alone or with manure. This phosphate is made, as its name implies, for the hill or drill or for broadcast sowing. IT IS COMPOSED PRINCIPALLY OF BONE, thoroughly dissolved so as to make it active in all stages of plant growth.

BOWKER'S LAWN DRESSING.

No lumps, no odor, no weeds—clean as sugar to handle. This dressing is prepared for lawns, grass plots and cemetery lawns, and contains all the plant food required for the lawn grasses. It acts gradually through the season, and produces a luxuriant growth of grass of a rich green color, It is also a superior dressing for the flower garden.

Trial bags for 1,000 square feet 50 — 50 lbs., for 5,000 square feet, $1.50
" " " 2,000 " " $1.00 — 100 " " ¼ acre, . . . 2.50

BOWKER'S AMMONIATED FOOD for FLOWERS.

Soluble in water, free from odor, and easy to handle. It is made expressly for flowers grown in the house or garden.

Trial package . . . . 15 cents | Regular package, . . . 25 cents

LAWN GRASS SEED.

There is nothing more beautiful and pleasing to the eye than a well-kept lawn, with its close, velvety turf. To insure this the principal object is to use good seed. For this purpose we recommend our "Park" Lawn Grass Mixture, which comprises all the finest qualities of natural grasses that are adapted for this purpose. In no case should manure be used. We have never used anything with better effect than Stockbridge Lawn Dressing, which contains no weed seed. The seed may be sown at the rate of four bushels per acre.

Price per qt., 20 cents; ½ peck, 75 cents; peck, $1.25; bushel, $4.00.

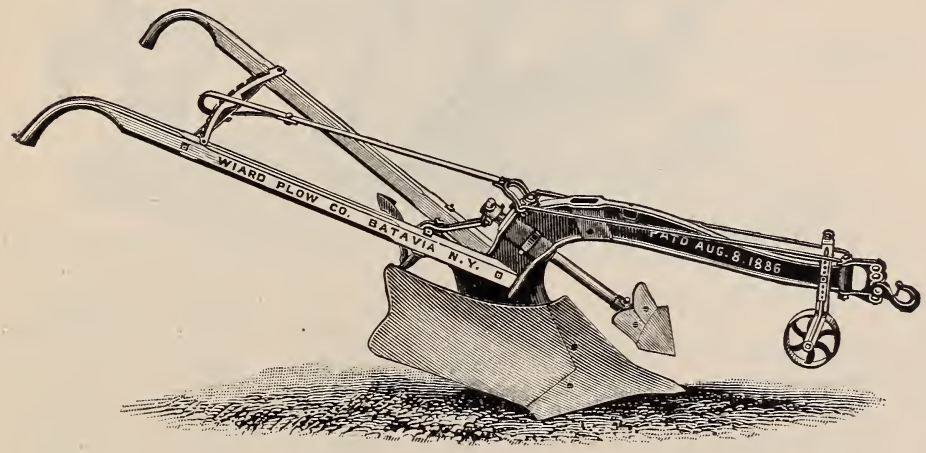
PURE PULVERIZED SHEEP MANURE.

The richest natural manure, the most nutritious food for plants and excels all others for the conservatory and greenhouse; use one part manure to six parts soil, or if used in liquid form 1 pound manure to 5 gallons water.

100 lb. bags, $3.00; 10 lb. pkg., 50 cents; 5 lb. pkg., 30 cents; 2 lb. pkg., 15 cents.

FARMING IMPLEMENTS
AND MACHINES.

THE WIARD PATENT SWIVEL PLOW.



This Plow has a movable automatic jointer, cutting a narrow slice from the edge of the furrow, which, being followed by the plow, is carried with all grass, weeds and stubble into the bottom of the previous furrow. It will turn a **flatter furrow than any other swivel plow.** Made with steel or chilled mold-board; it also has an improved Shifting Lever Clevis.

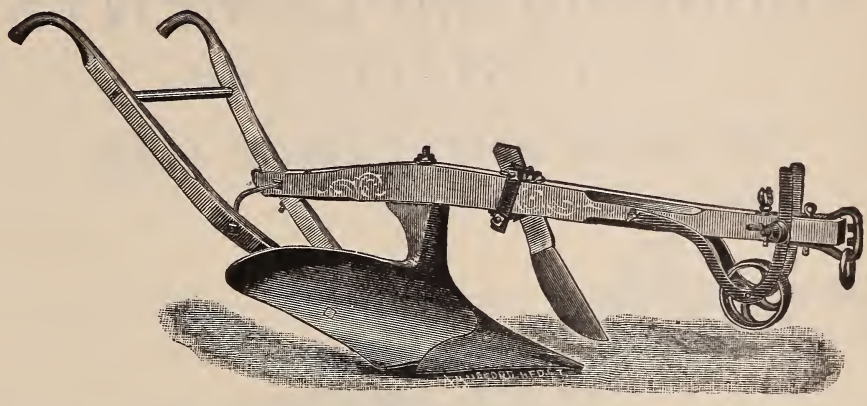
THE SYRACUSE STEEL PLOW.

There is a growing demand with farmers for a Steel Plow. We have secured the agency for the "Syracuse," which has a reputation second to none in this country, has Steel Beam and Mold-board.

No. 32, regular Two-horse, Full Rigged, $15.00.

DOE'S IMPROVED PLOW.



The Doe Plow needs no comments—it is so well known among the farmers of the State. It fills the bill for a good low-priced plow. Scours well, will not choke, light draft, and turns a flat furrow.

VERMONTER STEEL MOULD-BOARD PLOW.

These Steel Mould-board Plows are fast supplanting chilled plows. They are some 25 lbs. lighter on a regular two-horse size. The Mould-board will not break. They are warranted to scour in any soil and to stand in hard, rocky ground or among roots. A capital plow for breaking or plowing bog meadows, old pastures, etc. The best all round plow sold in New England. A plow that everybody likes.

No. 9. Two-horse.....$14 00 | No. 8. Med. Two-horse.....$13 00

Deduct $1 50 for each if without Wheel or Cutter.

THE SYRACUSE SULKY SWIVEL PLOW.

This Plow has two separate beams with a plow attached to each. When one plow is in the furrow the other is raised high out of the ground. It has an Automatic Adjustable Pole, which avoids all side strain on the team, and enables the plowman to plow a circular or crooked furrow. The Steel Mould-board scours in any soil. A trial of this new Plow will convince anyone of its superior merits. Send for circulars.

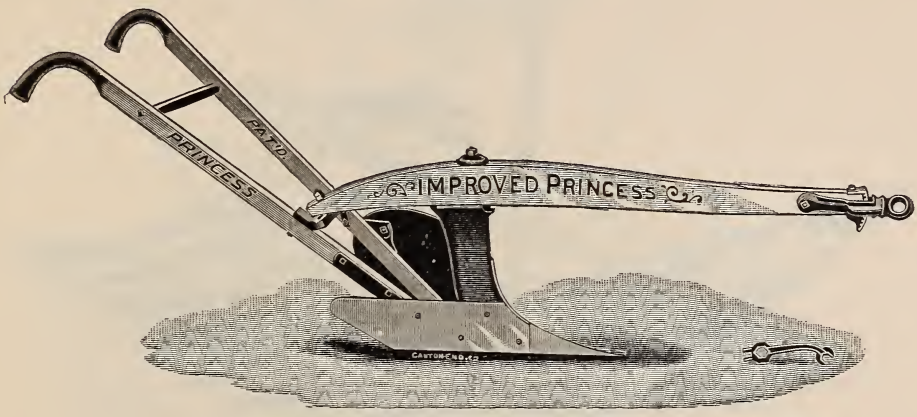
Price, complete.....$55 00

FISK'S AUTOMATIC CORN PLANTER.

It is the cheapest labor saving implement for sowing corn, beans, etc., ever offered, and will pay for itself several times over in a single season, and will plant all the ground a man can walk over in a day; works in all kinds of soil, and is especially adapted to re-planting.

Price.....$2 50

The Princess Chilled Steel and Combination Plows.



A novel feature of this plow is its Detachable SHIN piece on the front of the Mould-board. When this piece becomes worn or dull, as it is sure to do on any plow, it can be renewed like the point, at a cost of 25 cents, thus lightening the draft and saving the team. The beam is adjustable, and has a Swivel Clevis; draft very light. We warrant this plow to please the most critical who will take it on trial.

Made in all sizes, ranging from light one-horse to the heaviest road plow. Mould-boards, Beams, Points, etc., of steel to fit all sizes. Call or send for special circular.

The Only Successful Tedder in Heavy Hay.

THE THOMAS HAY TEDDER.

FOR ONE OR TWO HORSES, AS DESIRED.

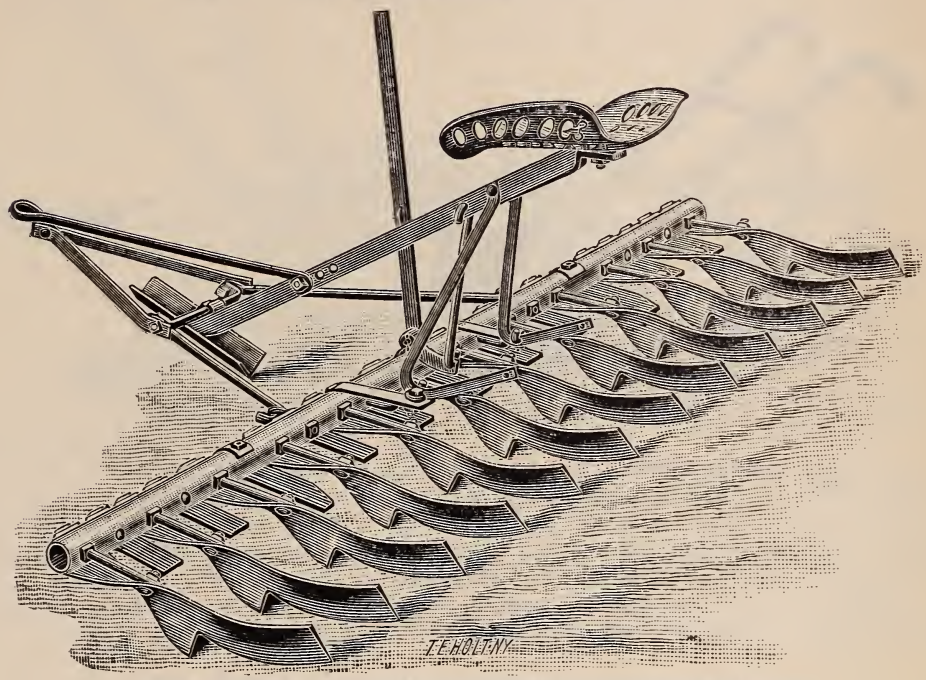
The New "THOMAS" TEDDER, as now built, is so far ahead of all other Tedders on the market, that it must be seen and examined to realize its great superiority. A Tedder gets so much jarring and racket in the field that it must be very strong throughout, and right there most Tedders fail. A continuous Steel Axle is used to prevent the risk of bending or breaking.

A Spring is placed on front of the Frame, which has a scope of six inches. By this method, when the fork strikes a stone, the Frame is relieved and PREVENTS BREAK-AGE. Steeel Crank Shafts are also used, perfectly fitted, the Journal and Bearings reducing wear and friction. The Steel Fork is separate from the Spring, and the greatest tension of the Spring is when the Fork is in position to use. As the Fork is bent back by an obstruction, the tension of the Spring becomes weaker, allowing the Fork to pass over a larger obstruction than any other Tedder.

This Tedder throughout is built in a most substantial manner, and of the very finest and strongest material, and though costing at first a little more than some others, will OUTLAST TWO OF ANY OTHER MAKE on the market.

PRICE.....**$38.00**

"ACME" PULVERIZING HARROW, CLOD CRUSHER and LEVELER.



The Cheapest and Best Riding Harrow in the World.

Size No. 15, for Two Horses (illustrated) has a **wrought iron tubular bar,** which is provided with **twelve curved cast steel** Coulters, supplemented by flat cast steel Crushing Spurs. The forward half of each Coulter is curved to the left, while the rearward half is curved to the right, thus forming a **double gang.** By this arrangement of the Coulters the whole surface of the ground is **cut, lifted and turned.**

Two runners are attached to the bar, which **serve the purpose of a sulky** in transporting the Harrow, and in a measure regulate the depth of work.

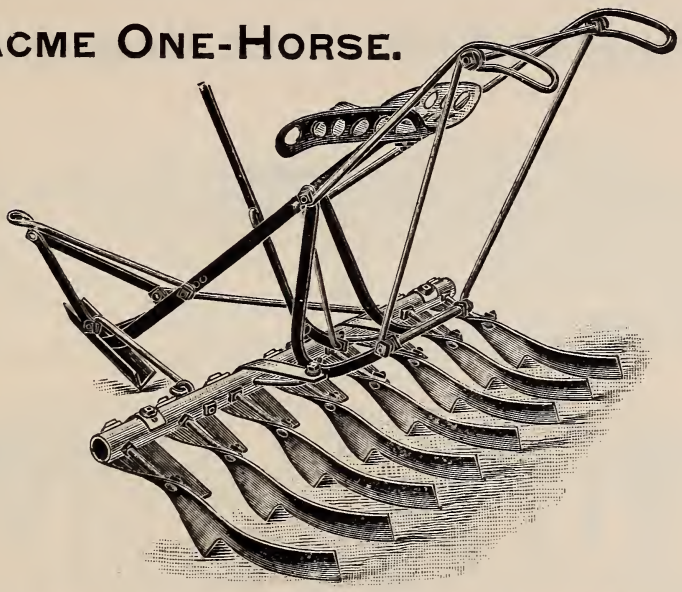
This Harrow is adapted to both heavy and light soils. While very **strong,** it is extremely **light,** and is therefore susceptible of doing light surface work, such as finishing off for seeding, working onion beds, truck gardens, etc , which heavy harrows cannot do because of their great weight. When covering grain or doing heavy work the No. 15 may be weighted with 25 to 60 pounds, in the shape of a bag of earth, log or piece of rail-road iron, and when so weighted **it will do as thorough execution in hard soil as the heaviest styles.**

No. 15 is provided with a seat and has a short draft pole or bale. It works about 6½ feet wide and weighs about 110 pounds.

Since the advent of this style "Acme" Harrow, we have more than doubled our trade in Rhode Island.

Price,---No. 15.....$16.00

ACME ONE-HORSE.

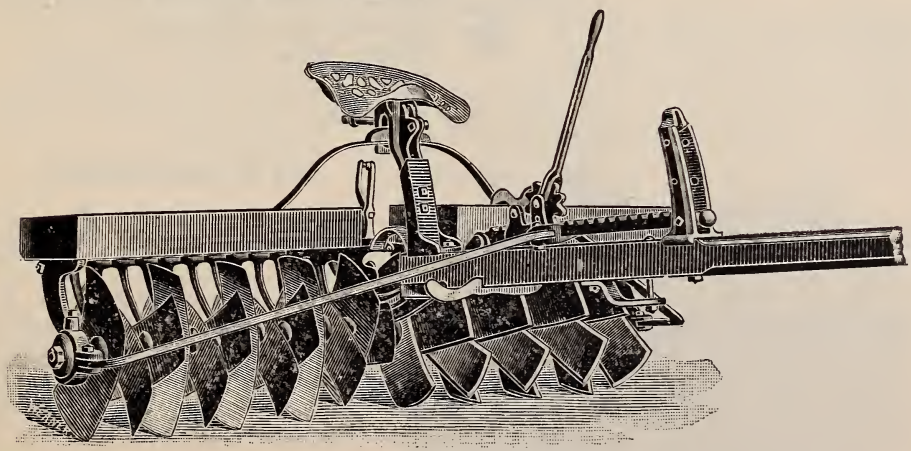


Works 4 ft. 4 ins. wide. Weight 80 pounds.

SIZE **D.** This size is built on the same plan as No. 15. Has eight Coulters, also Crushing Spurs. Works about 4 feet 4 ins. wide, weighs about 80 pounds.

Price.....$14.00

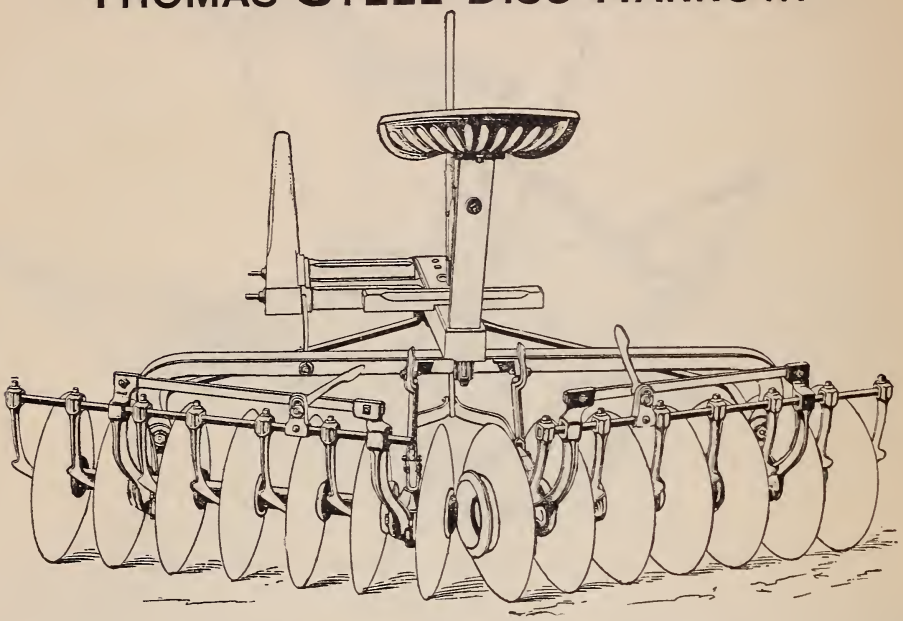
DRADER'S PATENT SPADE HARROW AND CORN CULTIVATOR.



This Harrow has 26 double end Steel Spades in double concave form, giving 104 cutting edges. These spades cut and pulverize the earth every 3 inches, which is double the cutting surface of any other disc harrow. It also has a Spring Tooth in the centre, thus leaving no ridge and clearers to the spade. The centre Spring Tooth can be lifted by lever so that the Harrow can be used to straddle the row, to cultivate corn or potatoes.

Price.....$33.00

THOMAS STEEL DISC HARROW.



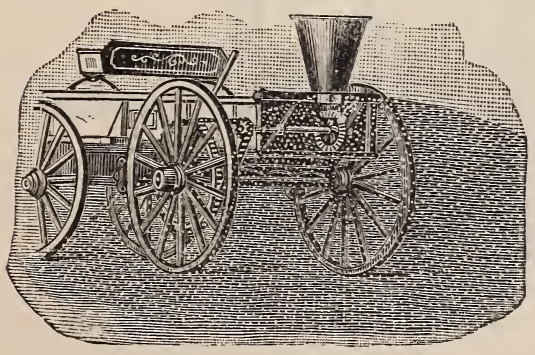
THE THOMAS DISC HARROW was introduced in 1892, was largely sold in 1893, and its success was prompt, general and decisive.

It has a Steel Beam, heavier than heretofore, square Iron Axles, Steel Seat Support, Steel Discs, almost a solid Steel Harrow, and is the most Durable Disc Harrow made, the Tongues alone being of wood.

Practical use of this Harrow has proven that the Thomas Harrow is actually the

SIMPLEST and STRONGEST.
LIGHTEST DRAFT.
DOES THE BEST WORK.

It has case-hardened boxes, easily oiled, and sand and dirt-proof. The Thomas Harrow we make with first-class improved Scrapers which fit the Disc closely when wanted. The Thomas Disc Harrow this year is neater, better, stronger and handsomer than it ever was. Price with first-class Scrapers, Pole, Neck-Yoke and Double Trees, all complete, **$28.00.**



STROWBRIDGE
Broadcast Seed Sower.

Sows grass seeds, oats, barley, rye, etc., and fertilizers. This machine is readily attached to the tail-board of a wagon. Sows eighty acres of grain a day, better and faster than any other method; perfectly simple.

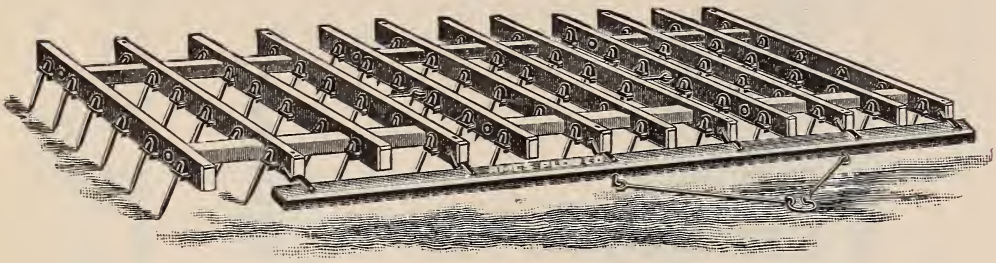
Price, complete.... ....**$15.00**

"Eclipse" Corn Planter and Fertilizer Distributor.

Specially designed for planting field or ensilage, corn, beans or beet seed, at the same time accurately distributes commercial fertilizers, ashes, etc., full strength, wet or dry.

Price.....**$25.00**

Star Reversible Smoothing Harrow.



This Harrow is so constructed that the teeth draw from one side of the harow straight and from the other side slanting, as shown in illustration. It is the best harrow made for the cultivation of growing crops, as well as for seeding and other uses.

LIST PRICES.

2 Section, with 48 teeth.....$11.00
3 " " 72 " (illustrated).... 14.00

STEEL COULTER SHARES HARROWS.

These Harrows, so well known throughout New England, are a great improvement over the old cast iron tooth. The teeth are strong, and thus enabling it to cut its way through sod or old ground.

9 "	**10.00**	**13 "**	**12.00**

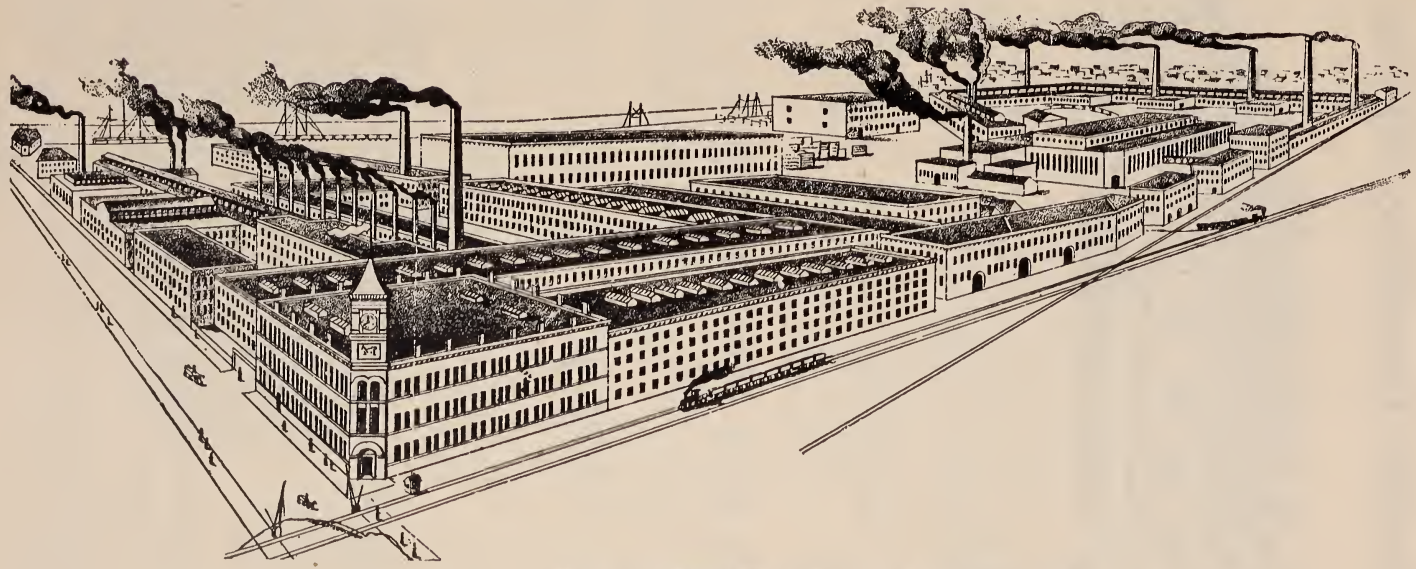
"Breed's" Universal Weeder and Pulverizer.

This Weeder is to be drawn by one horse, is invaluable for weeding hoed crops, if used as soon as the weeds make their first appearance,—for putting in grain, grass seed, Hungarian grass, and for pulverizing manure spread on grass land working in fertilizers, it has no equal. It takes the place of more expensive implements heretofore used for harrowing crops, at a small expense. Fingers made of Spring Steel, the whole weighing less than 75 pounds.

Sherwood's Novelty Steel Harness.

This harness is a novelty, because it has neither eveners, whiffletrees, or traces. It is made of Steel, and will not break. A pair of horses, with one draft chain, can pull a harrow, stone-drag, logs, wagon or mower, and is especially adapted for plowing, and can run close to fruit trees, walls or fences, same as with oxen, with no whiffletrees to step over or thump the horses' legs.

Price.....$12.00



THE IMMENSE PLANT OF

WILLIAM DEERING & COMPANY,

CHICAGO, ILL.

Makers of the Celebrated Deering Mowers, the largest works in the world devoted to the manufacture of Harvesting Machines. Covers 51 acres of ground, employs 3,000 men, turns out one finished machine every minute of each hour of every working day ten months in the year.

All the Deering Mowers Exhibited at the World's Fair were granted

FIRST PRIZES

By the Committee of Awards. Only one other prize, and that a secondary one, was awarded to any other mower now made.

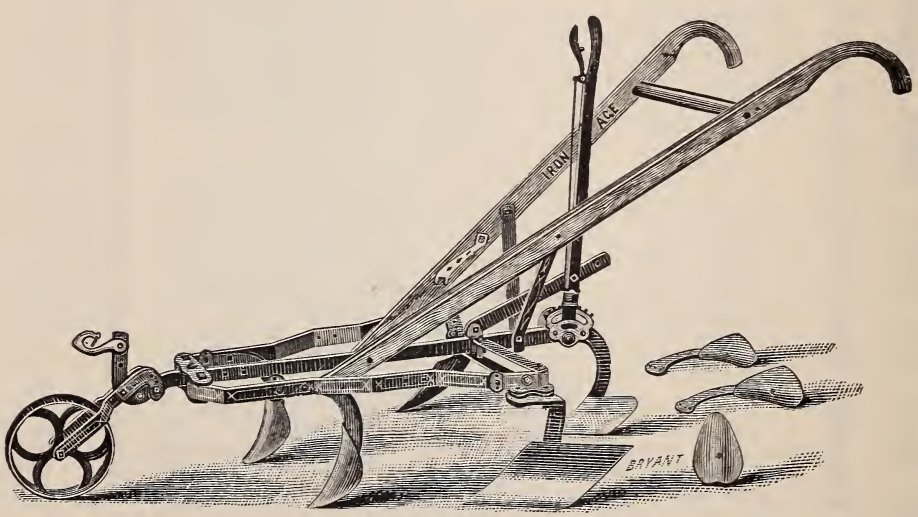
STATE AGENTS FOR

E. S. & F. BATEMAN'S
Celebrated Implements.

THE IRON AGE HORSE HOE AND CULTIVATOR.
THE ORIGINAL DIAMOND TOOTH CULTIVATOR.
THE GEM SINGLE WHEEL HOE.
THE JEWEL DOUBLE WHEEL HOE.
THE NEW MODEL SEED DRILL.
THE COMBINED CART AND WATER BARREL WITH SPRAY ATTACHMENT.

Iron Age Horse Hoe and Cultivator

WITH PATENT LEVER ATTACHMENT.

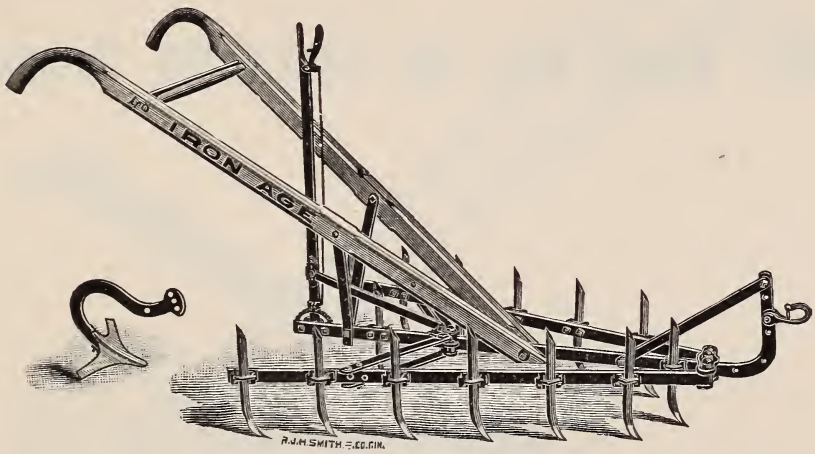


THE IRON AGE is in all respects a first-class implement, made entirely of Steel. It is very strong. The Wheel Straps also still make it more durable than the common iron casting. It is arranged for hand lever adjustment or with braced handles, which have a side shift to enable the operator to walk on one side, if so desired. Can be used as small Plow, Horse Hoe Cultivator Furrower, Coverer and Weeder—an indispensable tool to every farmer.

Price reduced as follows:

Horse Hoe and Cultivator Combined, plain.....$7.00
" " " " " **braced handles..... 7.50**
" " " " " **lever attachment..... 8.00**

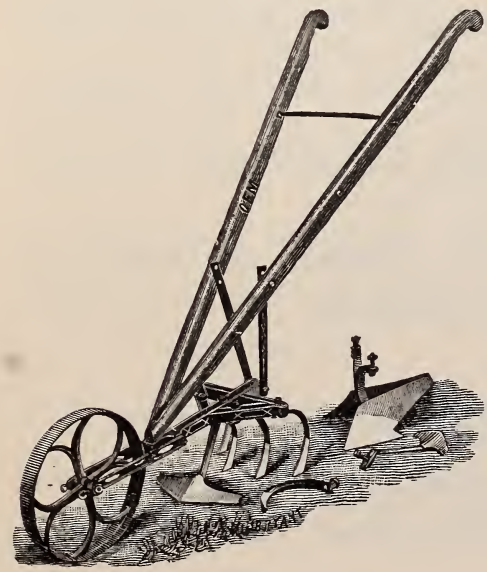
The Original Diamond Tooth Combined Harrow and Cultivator.



This Harrow, introduced by us several years ago, is fast becoming a general favorite with Market Gardeners, Strawberry Raisers and others. The Frame is made of Steel. The Castings are all Malleable. The Diamond Pointed Teeth are reversible, and can be adjusted as a spike tooth, smoothing or a common cultivator. It loosens and mellows the soil, and can be run close to plants without covering them. The Price is so low that any tiller of the soil can afford to buy one.

BEWARE of the many imitations of this tool that are made of Iron and common castings. BUY THE BEST! You will find it the Cheapest.

Price, plain...**$5.00** With Wheel...**$5.50** With Wheel and Lever...**$6.00**



THE "GEM" WHEEL HOE.

A Most Useful Implement for the Cultivation of all Garden Crops.

It has a set of Adjustable Steel Teeth, two Push Hoes, and two small Plows to make furrows and to turn the soil to and from the rows. Valuable for Market Garden use.

We fully believe it to be the most practical tool for every day use that is offered to the public.

Double Wheel Complete.....**$5.00**
Single " " **4.50**
" " less Plows..... ... **4.00**

THE "JEWEL"

DOUBLE WHEEL HOE AND CULTIVATOR COMBINED.

In these days of "intense" farming, economy demands the use of Wheel Hoes. The entire frame of the "Jewel" Hoe is made of the best *malleable* iron, making an exceedingly light tool and at the same time giving an almost absolute security against breakages.

The "Jewel" is capable of being quickly adjusted in depth or width of working, or height of handles. As shown in cut, it is provided with four slender stirring teeth, each made of one piece of steel, unexcelled for thorough work, especially on hard soil; one pair of side hoes, particularly intended for use among small plants; also a pair of plows for throwing to or from the row, or for opening furrows. The standards of these hoes and plows are of malleable iron—no cast iron.

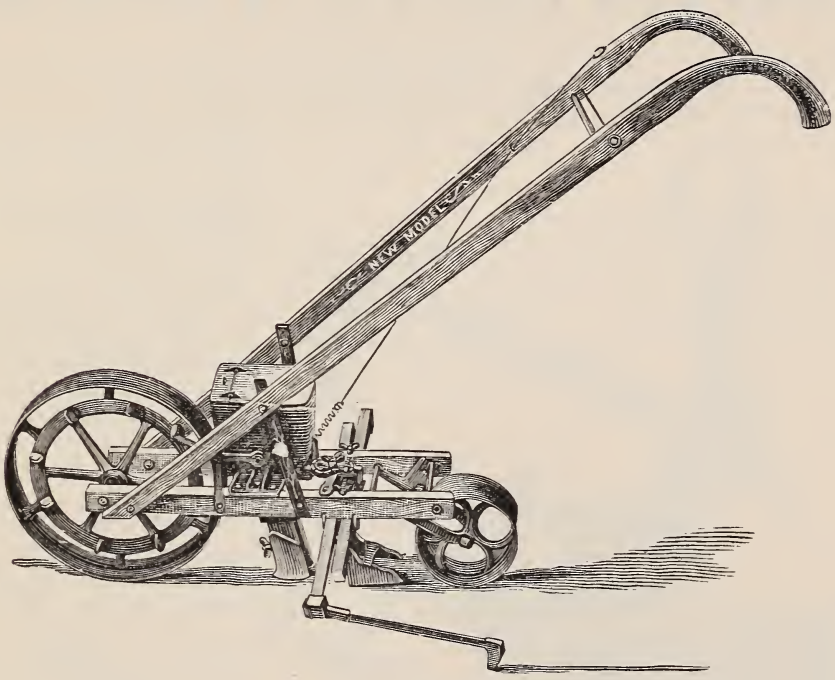
Are Carefully Made, Handsomely Finished, and Weigh but 22 lbs. each, Complete.

Price, complete . . . . . $6.00.

THE ELLIOTT WHEEL SCUFFLE HOE.

The only wheel hoe made which can be adapted for all widths of rows ranging from 5 to 19 inches. It is the most powerful common sense hoe for destroying weeds and loosening the soil among garden and bed crops ever made. Frame work and teeth are made of steel. Price, $5.00.

THE NEW MODEL SEED DRILL.



The improvements in this seed drill are worthy of special notice. The flow of seed from the diamond-shaped hole can be quickly moved to fit any size seed by a simple contrivance. This is unlike other drills, which are confined to certain sized holes in the dial plate and with no means of varying it. The flow of seed can also be instantly stopped by a swinging cut-off, instead of a slide, as on other machines. The flange of the wheel is wide, and there is a marked advantage over other drills in the manner of attaching the handles. We warrant these superior to any drill in the market.

Price, ... $8.00.

THE DIXIE IRON CULTIVATOR.

This cultivator is made wholly of metal with tempered steel teeth which are reversible; it is well made and finished, and is a stronger and better tool than the common wood frame cultivator. We offer this tool at a very low price with or without wheel, and our prices will place it within the reach of all.

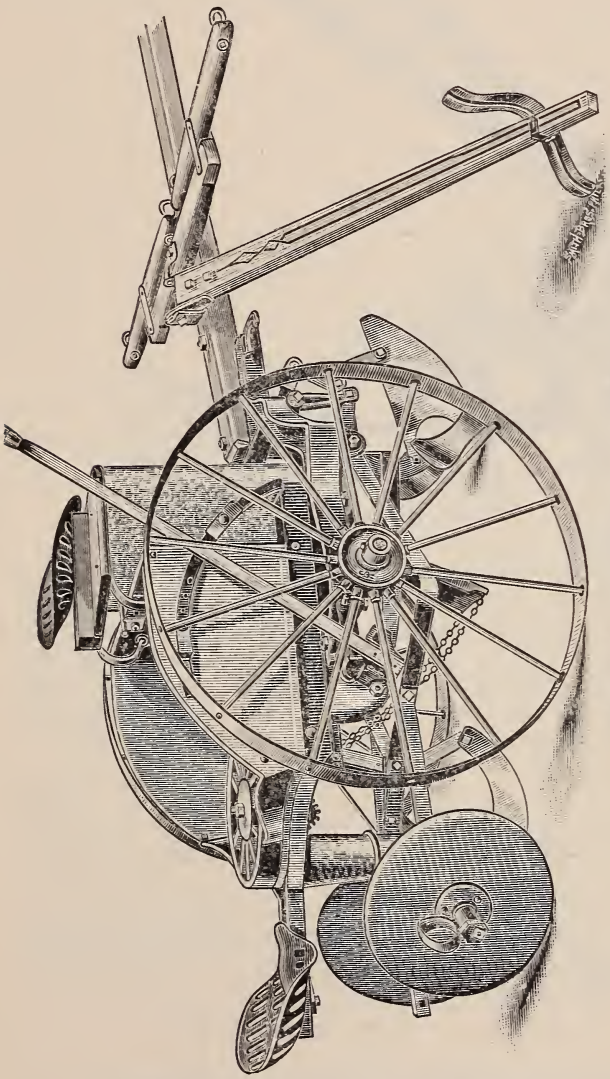
Price, plain, $4.00. . . . . Price, with wheel, $4.50.

SELF-ADJUSTING CATTLE STANCHION.

Smith's Swivel Stanchion allows the animal the most perfect freedom to lie down or get up, or lick its side; it is safe and durable, and convenient for man and animal.

THE IMPROVED ROBBINS'
POTATO PLANTER.

THE operation of the Planter is so simple that it seems scarcely necessary to do aught than to call attention to the cut. The Opening Plow, provided with a Steel Runner to prevent clogging with trash, throws out a free furrow, with no packing of the soil to crowd the future growth of the crop; immediately following, comes the deposit of fertilizer (if used) in a broad stream across the bottom of furrow.



Then the drill tube through which the seed is dropped, about two inches below the fertilizer immediately followed by a pair of large Steel Discs, adjustable in every way, and covering the row with a full, free covering, in the most perfect manner possible.

The seed is not punctured or injured in any manner, but is prepared in the usual fashion for hand planting, and fed by the feeder, (a good boy is best) into the revolving feed wheel. This gives the assurance that the seed is actually deposited—there can be no speculation as to whether a row has any seed in it; there are no misses; no doubles; no trouble on hillsides. Neither can any injury result from contact of seed with fertilizer, as the former is deposited below the fertilizer, and the latter is also thoroughly mixed with soil. No waste of fertilizer material, as the flow can be instantly shut off; regulation of same quickly made by gate or change of gear.

Speed of feed dropping wheel likewise regulated by simple change of gear, the three sent out with Planter dropping at distances of 12, 15, or 17 inches.

SEND FOR SPECIAL CIRCULAR.

The handling of the Planter is exceedingly simple and easy, the movement of one lever at end of row stopping both potato and fertilizer feed, and raising opening plow and coverers from the ground. The Planter also has an attachment for sowing peas and corn.

Price of Planter (plain).....$60.00
" " with Fertilizer Attachment.....70.00

QUEEN OF HORSE RAKES.

THE "ROYAL" SELF-DUMP.

FOR ONE OR TWO HORSES, AS DESIRED.

This rake has a solid and continuous steel axle or spindle running through the rake from wheel to wheel.

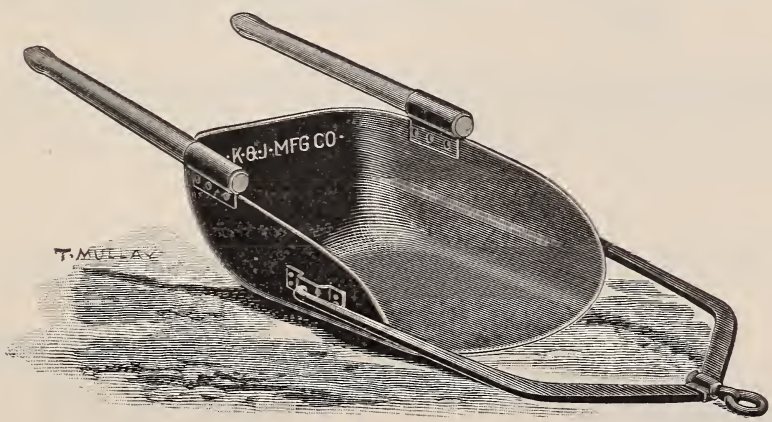
The dumping cog-wheel is placed in the centre of the rake and enclosed in an iron boxing or cover, thus protecting it from breakage, and preventing the lines of the harness and hay from winding in it (common faults of other rakes,) and either breaking it or preventing the rake from dumping.

Oscillating Cleaner.—Is an effectual device to prevent rolling of the hay. By this Cleaner the hay slides—does not roll.

Price.....**$26.00**

SOLID STEEL SCRAPER,

OR OX SHOVELS.



THE PERFECT SCRAPER, made of a single sheet of steel, pressed into the best and most practical shape for working.

It is made with one continuous curve from the centre up the sides and back, giving it greater strength and capacity than can be obtained in any other way.

It is without Joint or Seam, and there is not a sharp corner, angle, bolt, brace or stay-rod about the Scraper.

It is the Lightest, Strongest, and most Durable, and will displace all others wherever it is known.

No. 1 holds 7 cubic feet.	**Price**.....	**$9.00**
" 2 " 5 " "	"	**8.50**
" 3 " 3 " "	"	**8.00**

Eight Practical and Durable Tools in One.

Keeler Seeder Combined Machine.

When **drilling** or **planting,** the operator can see the amount of **seed** being planted or drilled *by raising the cover over Seed Wheel.* The **Adjustable Hopper** is easily removed and seed emptied.

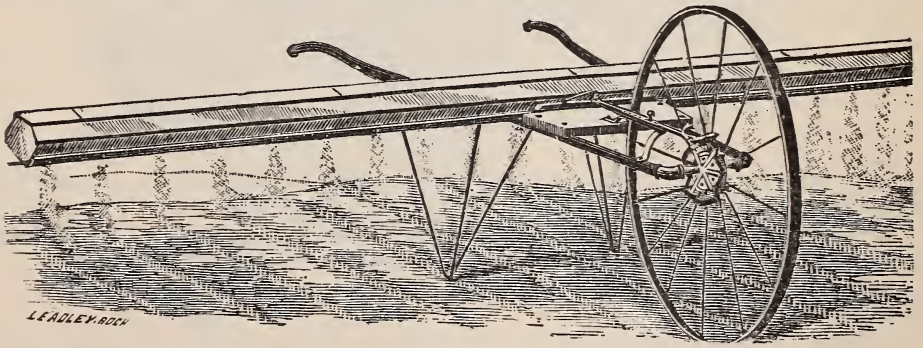
No other Drill has these Two Advantages.

Plants in Hills 6, 12, 18 and 36 inches apart. Also DRILLS in a perfect continuous row. Handles all kinds of Seeds, Fine and coarse. **Accurate, Durable, Simple.** It has a TWENTY INCH Drive Wheel, and will WORK IN ROUGH SOIL as well as Smooth.

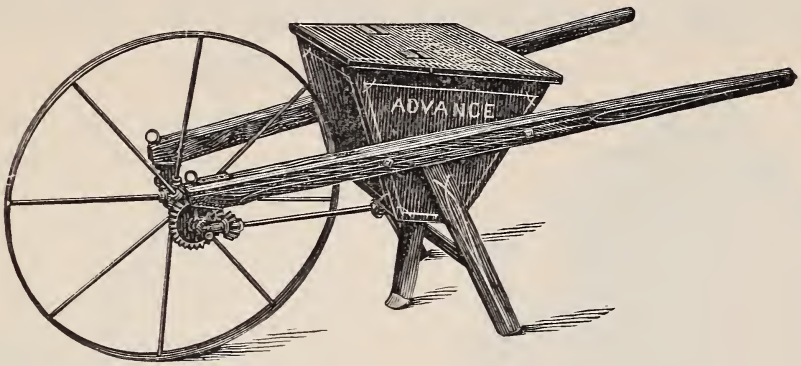
Will Hoe or Cultivate on BOTH SIDES OF A ROW, as shown in cut. ALL TOOLS are arranged to work ONE or BOTH SIDES of a row. Adapted to farmers, gardeners, florists and nurserymen. **Price of Seeder, $9.00. Combined Machine, $12.00.**

THE CROWN SEED SOWER.

For Sowing Clover, Herds-Grass, Red Top, Hungarian, Etc.



No farmer who sows grass seed can afford to be without this simple and effective machine. Quantity can be gauged from two to twelve quarts per acre. Sows twelve feet wide, aud as accurate as a force feed drill. Runs light, weighs 35 lbs., will sow from 15 to 20 acres per day; can be used in wet, dry or windy weather; it it made and finished in a superior manner. **Price $10.00.**



"ADVANCE" FERTILIZER DRILL.

The increased use of commercial fertilizers has fairly compelled the farmer and planter of the present day to provide himself with approved appliances for properly and economically distributing these adjuncts of modern farming.

We claim the "Advance" to be the best low-priced distributor on the market, and would call attention to its distributing disc, of *galvanized* iron, which can neither break or rust; also to the wrought iron wheel, light and strong.

An addition for '94 is a shut off, to prevent the escape of fertilizer when wheeling around the end of row.

A first-class tool for the drilling of peas and corn. Price $9.00.

SPANGLER BROADCAST FERTILIZER DISTRIBUTOR.

Performs the work of broadcasting damp or dry fertilizer, plaster and lime in any quantity per acre, in a perfect manner. The box being low, is easy to fill, and can easily be thrown in and out of gear by the driver without leaving the seat. Easily operated and very simple.

Price, 1-horse, . . . $38.00 | Price, 2-horse, . . . $65.00

FRY'S NEW POTATO FURROWER.

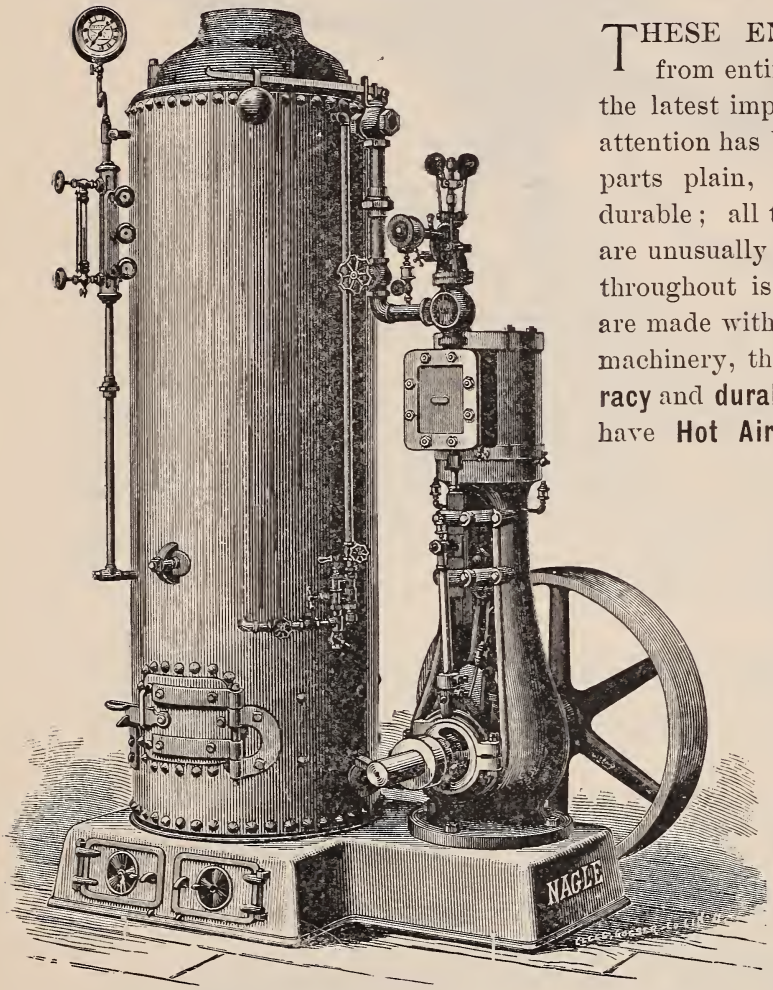
This new machine, drawn by two horses, opens the furrows, distributes the fertilizer, then after dropping the potatoes by hand, cover the potatoes quickly and in a perfect manner. In short it performs all the labor of planting except dropping the seed.

THE GEM LAWN RAKE.

This is made in the most thorough manner and of the best spring steel, perfectly cleans lawns from leaves, loose grass and rubbish, without tearing the roots. Saves the trouble of picking leaves from the teeth, levels and prepares a flower bed for seed better than any other tool. It works easy, and is drawn over the ground instead of carried.

UPRIGHT TUBULAR BOILERS & ENGINES

Combined on One Base.



THESE ENGINES are built from entire new patterns, with the latest improvements Special attention has been paid to make all parts plain, simple, strong and durable; all the wearing surfaces are unusually large The **material** throughout is the best, and they are made with the latest improved machinery, thereby securing **accuracy** and **durability.** The **Cylinders** have **Hot Air Jackets,** which decrease the condensation in cylinder. The arrangement of the **Steam Chest** and **Steam Ports** is such that all the water forming in the cylinder is readily carried off, the **Ports** extending below the bottom of cylinders, a perfect drainage is secured.

Having sold several of these engines in Rhode Island in the past season, that have given perfect satisfaction, we do not hesitate to recommend them, and all who contemplate purchasing will do well to call on us for further particulars and references.

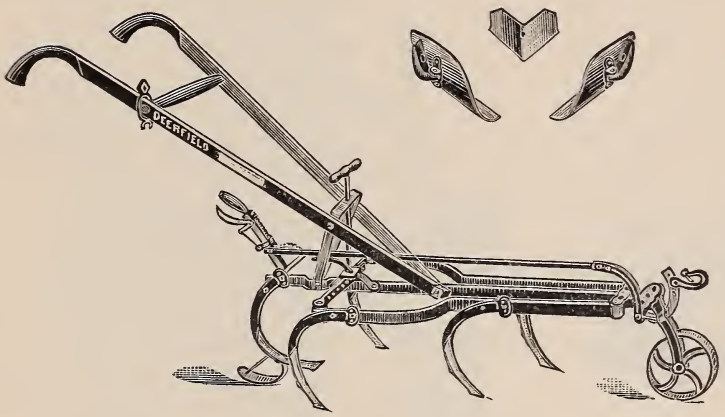
Horse Lawn Mower.—Colwell's "Improved."

We guarantee this to be the best ever made. It has side-draft attachment to enable the horse to walk on the cut grass only, and castor rollers which will not mark the lawn. We secure evenness of cut by an adjustment which raises or lowers the two sides at the same time by means of a simple lever movement; the same lever serves the purpose of raising the knives from the ground when driving over gravel walks or roads. The mowers are fitted up with steel shafting and composition split bushings, the utmost care is taken to have the workmanship perfect. Send for a special circular.

THE NEW DEERFIELD
Double Lever Cultivator.

It has a rigid Lock Lever and no loose joints. We direct attention to the Improved **Lever Expander** device of this Cultivator and the **wheel-and-slide adjustment** as shown in cut, which allows transporting from field to field without lifting the Cultivator or loading on a wagon.

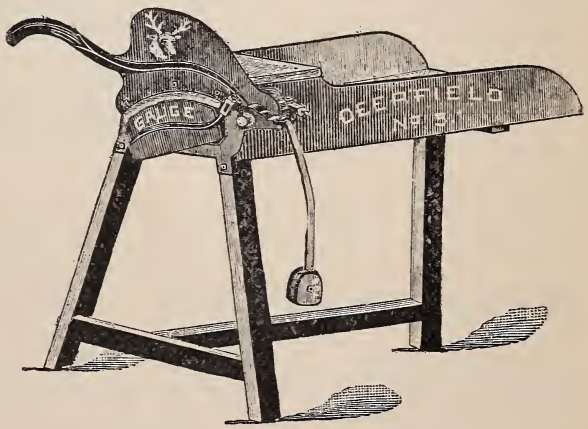


THINK OF IT! This Cultivator, with WHEEL AND REAR TOOTH ADJUSTMENT, can be lowered in the ground ANY DEPTH REQUIRED by moving Lever forward, and the only one that raises BOTH ENDS of Cultivator at same time, which is very necessary IN SOFT GROUND, where the PLANTS are SMALL to break the crust around the plant, which will rapidly increase its growth.

Price Horse Hoe and Cultivator Combined..... **$8.00**

DEERFIELD BALANCE LEVER CUTTER.

A great improvement over the old style Lever Cutters. The weight being attached to opposite side of Hand Lever, as shown in cut, the Balance has the same power over the Knife that a balance wheel has on a rotary cutter, the knife being forced up and down by momentum of balance, actually making a power machine requiring but very little labor to operate. The throat being of large capacity, feed can be cut rapidly and at any desired length, which is regulated by a Gauge that can be changed in a moment.

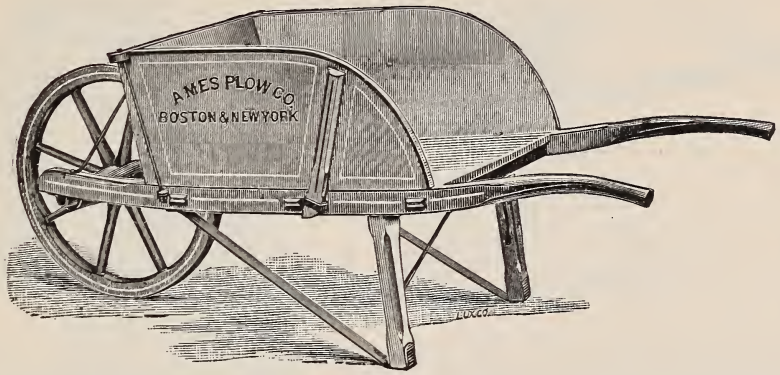


Adjustment for regulating knife is far superior to anything heretofore used. The frame is of hard wood, painted, oiled and varnished.

For simplicity, durability, and perfect running arrangement, the "DEERFIELD" has no superior and but few competitors.

Price..... **$5.00**

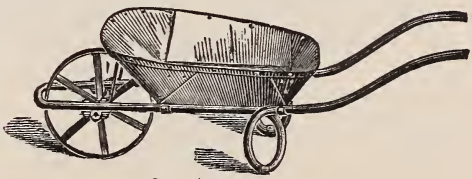
Garden Wheelbarrows.



We carry in stock a full line of Garden Barrows, both painted or varnished on the wood, in several sizes; also special Delivery Barrows for printers' and binders' use.

COCKBURN STEEL TUBULAR BARROWS.

Owing to the manner of putting these Barrows together, and the simple and peculiar construction of the legs and handles combined, which are in *one piece* of tubular steel without joint or bolt, makes these the most DURABLE and LIGHTEST of Steel Barrows.

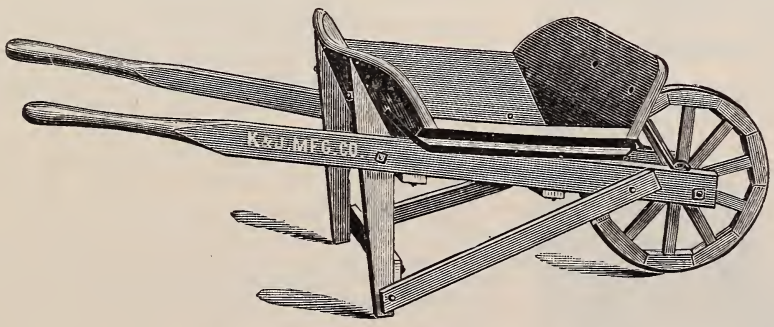


SIZE A.

SIZE D.

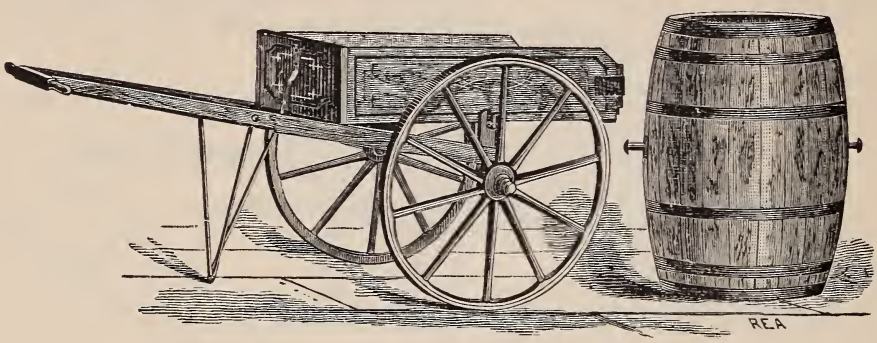
They are made in many styles, the accompanying cuts showing those most commonly used. Size A, a Dirt or Concrete Barrow. Size D, a Coal Barrow.

CONTRACTORS' BARROWS.



A full line of the best make of CONTRACTORS' DIRT and STONE Full Bolted Barrows, with either the STEEL or SARVIN PATENT WHEEL; also common one-half bolted Canal Barrows. Prices on application.

COMBINED BARREL TRUCK and HAND-CART WITH SPRAYING ATTACHMENT.



When we consider the almost innumerable uses to which our Combined Truck and Hand-cart can be applied, its "handiness" and the immense amount of time and hand labor saved by its use, it is not a matter of surprise that it is steadily growing into popular favor. It is one of those articles that causes the user to wonder how he ever did without it, as it really becomes indispensable when once used.

The barrel is raised from the ground, carried to the place desired and INSTANTLY DETACHED, all WITHOUT HANDLING. The weight being balanced over the axle, no lifting or down pressure is needed in transportation.

The body with trunions and spring catch makes a very superior dumping hand-cart.

Price of Truck with Trunions for hand	**$9.00**
" " Body Extra	**3.00**
" " Barrel "	**2.00**
" " Pump "	**5.00**
" " Complete	**16.50**

THE NEW WONDER!

Combination Spray Pump.

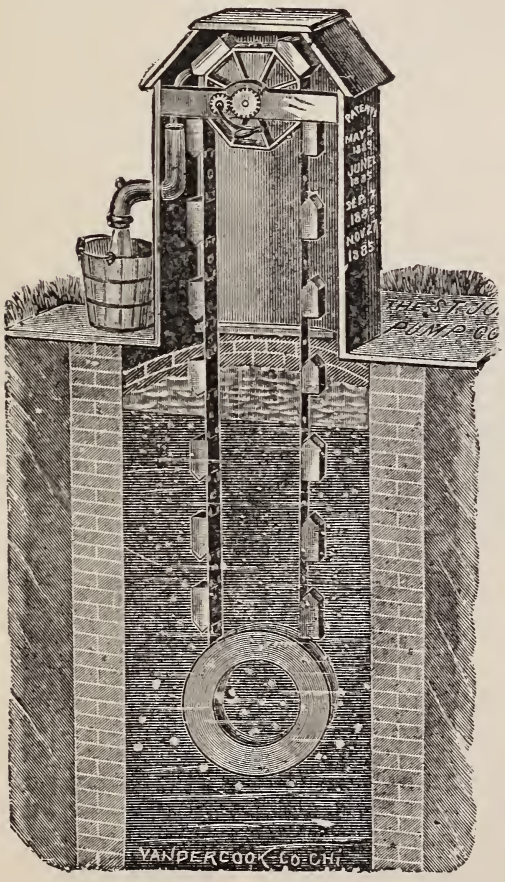
In buying this Pump you get THREE COMPLETE BRASS MACHINES INSTEAD OF ONE. The advantages are apparent, as in case you do not wish to use the Pump for spraying purposes, Pump part can be instantly detached and Agricultural Syringe Attachment put in place. It then becomes an Agricultural Syringe or Potato Bug Exterminator, with which a man or boy can spray six to ten acres of potatoes a day. There is no other machine that will do the work so thoroughly. The Veterinary Nozzle is a valuable acquisition, as you always have it at hand, and it may many times be the means of saving the life of a valuable animal.

We give a Valuable Illustrated Book on "OUR INSECT FOES AND HOW TO DESTROY THEM," with each pump. The knowledge contained in this book is just the information needed; tells you just the kind and quality of whatever poison is best adapted to rid your trees and vines of the different kinds of insect pests. Also gives illustrations of the different insects. Many of the illustrations show insects at work.

PRICE..... **$5.00**

THE "PERFECTION"
Water Elevator and Purifying Pump.

It is the Simplest structure ever devised for raising water. It is the most easily adjusted to any well or cistern. Any one can put one up in fifteen minutes, as it has no attachments to any part of the well or cistern below the platform. It is the most durable. Every chain is tested to ten times the strain it is required to stand. The buckets bear no strain except the weight of water in them. The complete *Chain and Bucket being galvanized after construction, they never corrode.* It works easily. The chain balances itself. The only resistance to overcome is the weight of the water in the buckets, which is very light. IT WILL NEVER FREEZE.



It has none of the objections of the common pump. It has no wooden tubing to wear out, decay or pollute the water. No iron tubes to rust, no rubber valves, no cylinder plungers to get out of order. Never has to be packed, primed or thawed out. A little girl seven years old can draw water with ease from a well or cistern. *It will make bad water good and good water better.*

PUMPS.

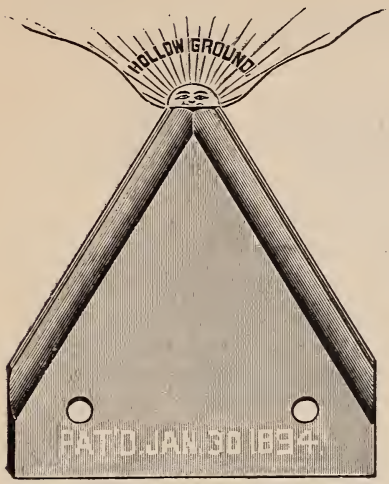
The "Thomas" Force Pump. Brass cylinders, adapted to all kinds of wells. Non-freezing. Adjustable for right or left hand, at will.

Buckeye Force and Lift Pump. For hand or wind-mill use; is made for wells from 30 to 100 feet deep; porcelain cylinders, brass valve seat and double acting.

Walker Cucumber Wood Pump. Porcelain lined cylinder.

Walker Chain Rubber Bucket Pump. Well adapted for farm and stock purposes.

Rumsey Hand and Lift Pump. Also a full line of Common Pitcher and other low priced Pumps and **Drive Well Points,** in all sizes.



THE NEW PATENTED

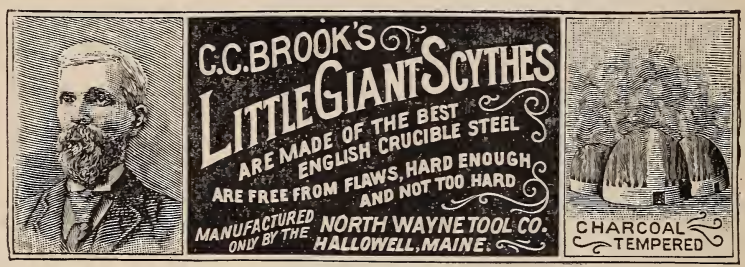
HOLLOW GROUND MOWER SECTIONS

ARE acknowledged by more than 5000 dealers to be one of the greatest labor saving inventions to the farmer ever put on to a mowing machine. With the use of the Hollow Ground Mowing Section, the Knife is seldom if ever taken out of machine. When the edge becomes dull, simply use a whetstone, and hone as you would a razor.

☞ we shall keep a supply of these Sections to fit the Mowers mostly used in this vicinity. **They cost no more than the old style. Try them.**

IF YOU WANT THE BEST

BUY THE *LITTLE GIANT* SCYTHES!



Now, to all interested, we say that the LITTLE GIANT SCYTHES bearing the label which is shown above, are made of Firth's Best English Crucible Steel. The Rib or Half Pipe that runs from end to end increases its strength to half the amount of the back without adding any weight, which overcomes that trembling which is felt in mowing heavy grass with cheap and plain scythes. We are exclusive agents for R. I.

THE LEVIN PRUNER.

ASK TO SEE IT.

The Strongest Hand Shear extant.

Speaks for Itself!

I am made of the finest steel, with dies, and although I weigh only 7 ounces, am a giant in strength. Of course I don't like to be strained, but if you wish me to, I will cut through HALF AN INCH OF DRY OAK. I would thank you for a drop of oil in my joints once or twice a year.

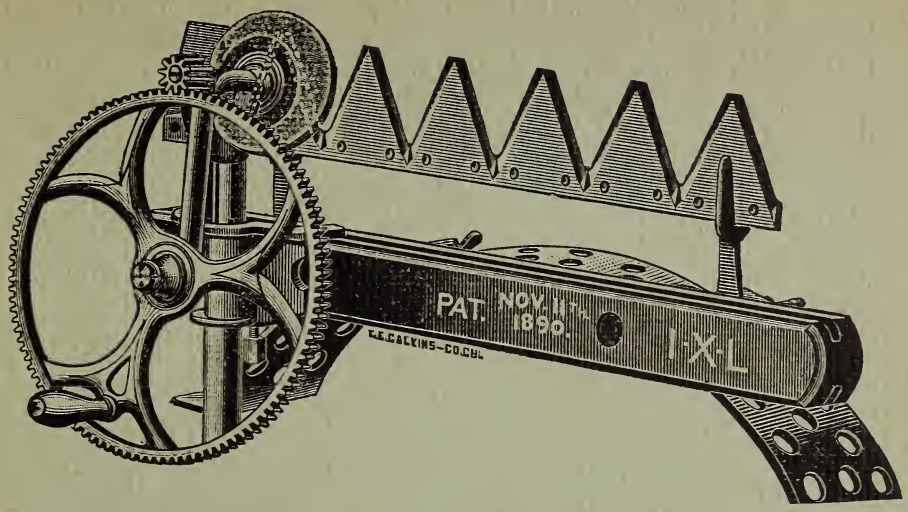
The Stoddard Churn.

The Most Popular Churn on the Market.

Has no floats or dashers inside. The principal of operation is CONCUSSION, and not FRICTION. The cover is removed in an instant and replaced as quickly. Cork packing that never leaks. Is made of WHITE OAK, and **will last for years.**

Eight Sizes.

THE "I X L" KNIFE GRINDER



The Easiest, Simplest and Most Practical Method ever Invented for Dressing and Grinding

MOWING MACHINES AND KNIVES.

NO COSTLY STONES TO BE KEPT IN ORDER!

The Only Machine that will grind every knife exactly the same and make any bevel desired.

The Only Method for grinding out gaps and leaving the same bevel as the balance of the knife.

LIGHT, SIMPLE, DURABLE, CHEAP, AND ALWAYS READY FOR USE.

The GRINDER when in use is attached to the wheel of the Mower—or a bench—and is operated by one person with the greatest ease. It will grind a Sickle in splendid shape in fifteen to twenty minutes. When the stone **is set for one blade it is set for all,** and every blade is ground exactly alike, and with exactly the same bevel from heel to point. Thus the points are not worn off, and the knives can be kept in perfect order as when new.
